

Software Engineering delivering intelligent systems, cloud solutions, and process automation. Strong track record in DevOps, and full-stack development across Indonesia, Singapore, and Thailand.

WORK EXPERIENCE

Software Developer, Freelance.

Apr 2025 - Present

- Designed and developed AI-powered web and mobile applications including mood-based playlist generation, automated document summarization, and intelligent chatbots.
- Built automation pipelines using n8n, Python scripts, and Hugging Face models to integrate data processing into client workflows.
- Architected cloud-native systems deployed on Docker & Kubernetes clusters for scalability and reliability.
- Delivered projects with microservices and REST APIs for high-performance systems.
- Led client workshops to define AI use cases and integration strategies.

Lead Software Developer, Bluzen Singapore

Jan 2023 - Apr 2025

- Led development of Warehouse Management System with automated fixture suggestions and anomaly detection.
- Implemented cloud infrastructure in Naver Cloud using load balancers, proxy servers, and secure VPCs.
- Designed end-to-end system architecture, ERDs, and UI/UX flows for enterprise software.
- Coordinated agile sprint cycles, assigning tasks, reviewing code, and ensuring on-time delivery.
- Supported overseas clients with remote deployment and troubleshooting.

Senior Software Developer, Kolink Network Solution

Sep 2020 - Jan 2023

- Directed development of attendance tracking, inventory, and sales platforms for Singapore and Thailand clients.
- Integrated RFID/UHF readers, face recognition, and mobile apps with backend automation.
- Managed ESXi and Kubernetes environments for system hosting and scaling.
- Created real-time analytics dashboards with Prometheus, Grafana.
- Handled cross-country team collaboration, requirement analysis, and client demos.

Fullstack Developer, Neotekid

Nov 2018 - Sep 2020

- Developed BI dashboards with twitter API trend analysis and data visualization for corporate clients.
- Built custom CMS, accounting systems, and government reporting platforms.
- Delivered technical training on Java Spring, AngularJS, PHP CI, and SwiftUI to enterprise teams.
- Supported deployment, bug fixing, and post-release enhancements.

Backend Developer, Lawencon

Apr 2017 - Nov 2018

- Maintained and enhanced LinovHR application (PHP Cake, Laravel, AngularJS, Java, Jasper).
- Created automated reporting modules using Java Jasper Reports and SQL optimizations.
- Worked closely with clients to capture requirements and deliver functional updates.

KEY ACHIEVEMENTS

ACS Bluzen Thailand

2024

Designed and maintained a high-traffic attendance system integrating face recognition and RFID, capable of handling large-scale data with high reliability and uptime.

Accounting PKBL Pertamina

2019

Built a comprehensive accounting system using ASP.NET and Vue.js, delivering robust financial management features with an intuitive user interface.

CORE EXPERTISE

PROGRAMMING

PHP (Laravel, CI), Java (JSP, Jasper, Spring), Go (Golang), Python (Flask,Django), JavaScript (Vue, React, Angular), R, Swift, Android, Flutter

AI & DATA SCIENCE

OpenAI, TensorFlow, Gemini, Hugging Face, Jupyter, NumPy, Pandas

CLOUD & DEVOPS

AWS, Naver Cloud, Google Cloud, ESXi, VMWare, Docker, Kubernetes, Jenkins, SaltStack, Prometheus, Grafana, Snyk

TOOLS

GitLab, n8n, Postman, Swagger, Slack, Jira, Atlassian, Figma, Nmap, Marvel, Kafka

DATABASES

MySQL, PostgreSQL, Oracle, SQL Server, Redis, MongoDB

EXCELLENCE

- 7+ years leading development from architecture design to production deployment.
- Hands-on experience with enterprise cloud infrastructure and DevOps pipelines.
- Delivered international projects for clients in Singapore & Thailand.
- Experienced trainer in multiple programming languages.

EDUCATION

VOCATIONAL HIGH SCHOOL

Tunas Media

2017
